

Sergei Mazhuga

Senior Frontend Developer — React / Next.js

mzhugasergei.github.io | mzhugasergei8@gmail.com

Frontend developer with 5 years shipping production React/Next.js applications, from public-facing sites to internal tooling. Track record of measurable impact: conversion-rate and revenue gains, Core Web Vitals / Lighthouse performance improvements, and workflow automation that cut manual processing by up to 85%. Comfortable owning a project end-to-end — architecture, REST API integration, and collaboration with backend teams.

EXPERIENCE

Web Developer — Cleopatra Trading Co.

Feb 2022 – Present

Incheon, South Korea

- Developed a fully responsive, accessible public-facing website with attention to Core Web Vitals and cross-device functionality, contributing to a 12% increase in revenue.
- Built and maintain custom internal web tools to streamline operations and workflows.

Front-end Web Developer — Molotov Group *(concurrent freelance engagement)*

Sep 2023 – Nov 2024

- Rebuilt and optimized public websites across three client brands (Energy Vostok, MSP, DVZ-TIM), boosting conversion rates by 25% and user engagement by 20%.
- Improved site performance scores by 15% (Lighthouse) and increased average time on site by 20% through responsive, user-friendly interface work.
- Collaborated with backend teams on REST API integrations, cutting data-processing time by over 20%.

Web Developer — STAKEME *(concurrent freelance engagement)*

Oct 2021 – Jul 2023

- Built STAKEME's official public website, in active use for 2 years prior to redesign.
- Delivered 4 internal web services for client companies, reducing manual processes by up to 85% and improving operational efficiency.

EDUCATION

Far Eastern Federal University

Aug 2020 – Aug 2024

Bachelor in Information Systems and Technologies — Vladivostok, Russia

- Graduation thesis: built a Twitter-like social network prototype (authentication, profiles, posts, comments, UI customization).
- Designed and deployed the university's Open Day website, used as the main registration/information hub for two consecutive years (2022–2023).
